

PD Nursing Forum

16.12.21

**Working together to provide quality PD services across
London and Surrey**

Aims of today's meeting

- Share LKN overall aim
- To share good practice – what are you really proud of that could be adopted in other units and what would you like to improve (an example of each)
- To explore and capture the themes from above
- Agree a regional focus that needs improvement – no solutions yet!
- Share simple QI methodology
- To agree next steps: How often to meet, QI support, developing leadership, collecting simple measures
- What support do you need

Overall Regional Aim:

To improve HT rates to a minimum of 20% (this includes PD & HHD)
'Getting It Right First Time'

PD workstream Aim: (our current focus)

1. Collect and share consistent peritonitis rates across London
Improve peritonitis rates across London (longer term focus)
2. Examine current training programmes and optimise quality to improve outcomes. (for discussion)

Principles

- Equity of access
- Patient involvement
- Based on population needs
- Leadership

HOW?

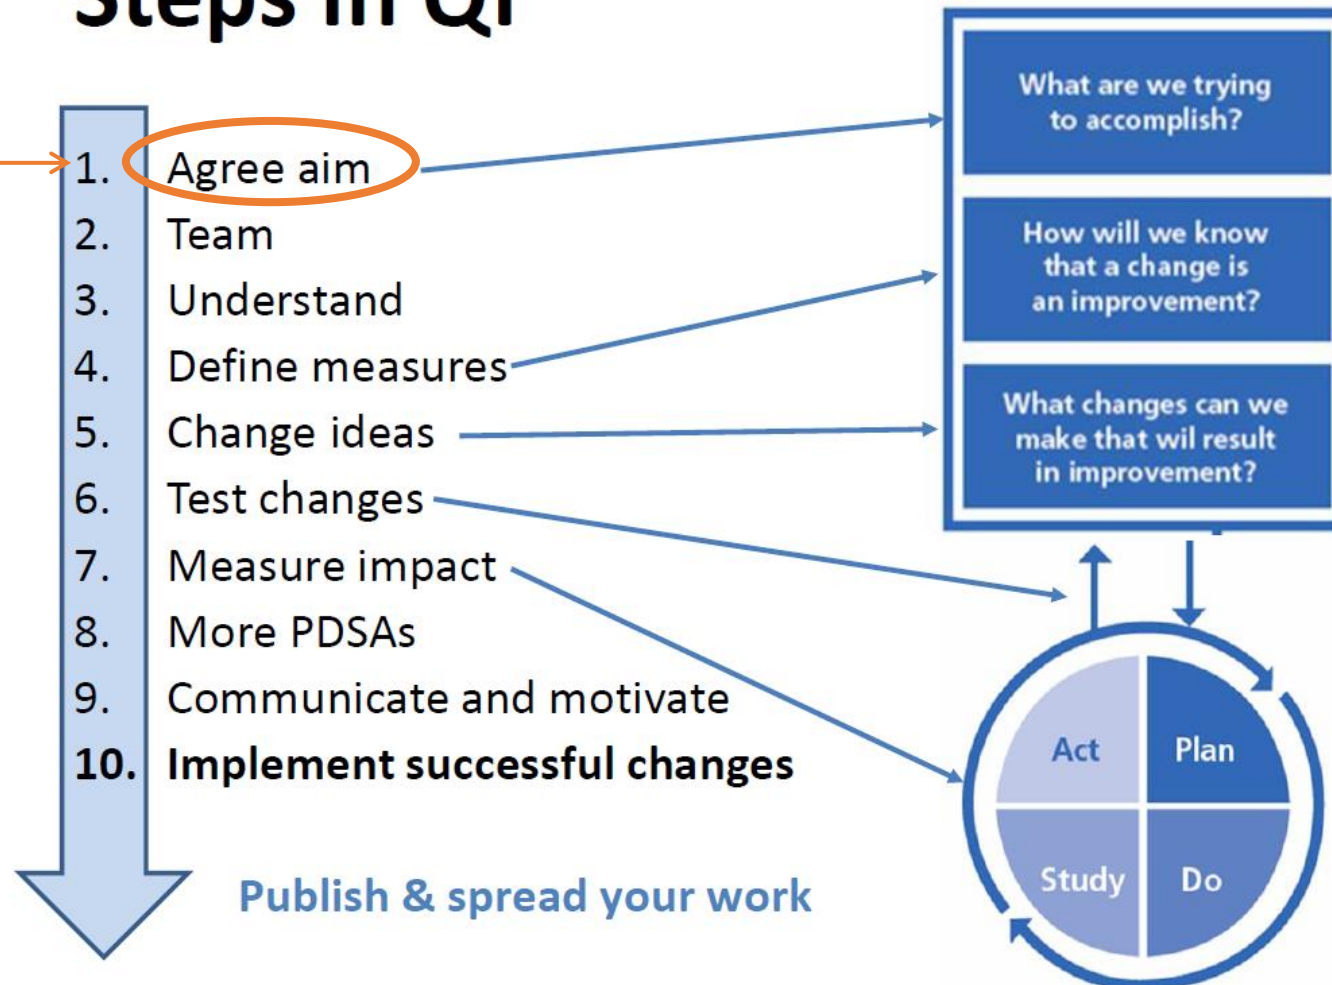

- Develop a QI nursing collaborative – empower and support YOU
- Collaborative working across London – sharing and learning
- Shared ownership of improvement with a focus on what you think is important
- Involvement of people with lived experiences in all stages of the process
- Adopting QI methodology and developing QI skills
- Developing leadership

QI Methodology

Steps in QI

AVOID JUMPING TO SOLUTIONS AT THIS STAGE

Training mapping

- Approx. 60% of people are trained by the PD provider
- Mostly group training
- Variable length of training: 1-6 days (4-30hrs)
- Most trainers assess how people are learning and adapt training according, it is unclear if formal assessments of learning style are undertaken
- Training is documented, unclear exactly what is recorded

You told us

- You would like to be able to do some in house training – hybrid model
- You are having problems with assisted PD

Percentage of people trained by PD Provider

Sharing Good Practice

- What do you do that you are proud of ?
- Do you do something that you feel other units could also adopt?
- What do you do that:
 - improves the quality of your service
 - improves patient experience
 - supports more people to choose and start PD
 - supports more people to remain on PD
 - ensures an equitable service

Next Steps.....?

If you think of anything else – please get in touch
