

The SHARED HAEMODIALYSIS CARE Staff questionnaire

Notes for staff:

Objectives of this questionnaire are to:

Involve everyone in the discussion about Shared Haemodialysis Care

Establish education needs

Establish barriers to implementation

Establish engagement level of staff

Establish the facts on staff views

Analysis of the results, together with the patients' Shared Haemodialysis Care audit, will demonstrate the gap between what your patients want and what the staff are, or need, to be prepared for and able to deliver. Plan a staff meeting to make a start on discussing how to close the gap.

'Working together to move forward as a unit'

The SHARED HAEMODIALYSIS CARE Staff questionnaire

1. What do you understand by the term Shared Haemodialysis Care?
2. What would you say are the benefits to patients?
3. What are your concerns for you and your patients?
4. How involved in Shared HD Care do you feel you are now and why?
(0 = I am not at all involved - 10 = I feel completely involved)

5. How involved would you like to be with Shared HD Care and why?
(0 = I am not interested - 10 = I really want to be involved)

6. How important is it to you to be doing Shared HD Care as a unit?
(0 = Not at all important - 10 = this is really important for our unit)

7. How confident are you at delivering Shared HD Care with your patients?
And why?
(0 = Not at all confident - 10 = really confident)

8. Describe any education you have had about Shared HD Care

9. What are your thoughts and ideas for taking Shared Care forwards?
