Mean Age at December 2008

The bar chart shows the mean age at December 2008 for various locations. The locations are listed on the y-axis, and the mean age is represented on the x-axis. The chart indicates that the mean age ranges from 50 to 80, with each location having a slightly different mean age.
Information Gathering

- **EuCliD 5** – an integrated data base capturing:
  - Demographics 😊
  - Co-morbidity 😞
  - Medication 😞
  - Treatment information 😊
  - Outcome data 😊
Are We Prepared to Take Part

• Yes
• But
  – Our approval
  – Ethical approval
  – Patient consent
  – Local Clinical agreement
  – Defined funding
  – Not commercially sensitive
  – Understood impact on nursing time
